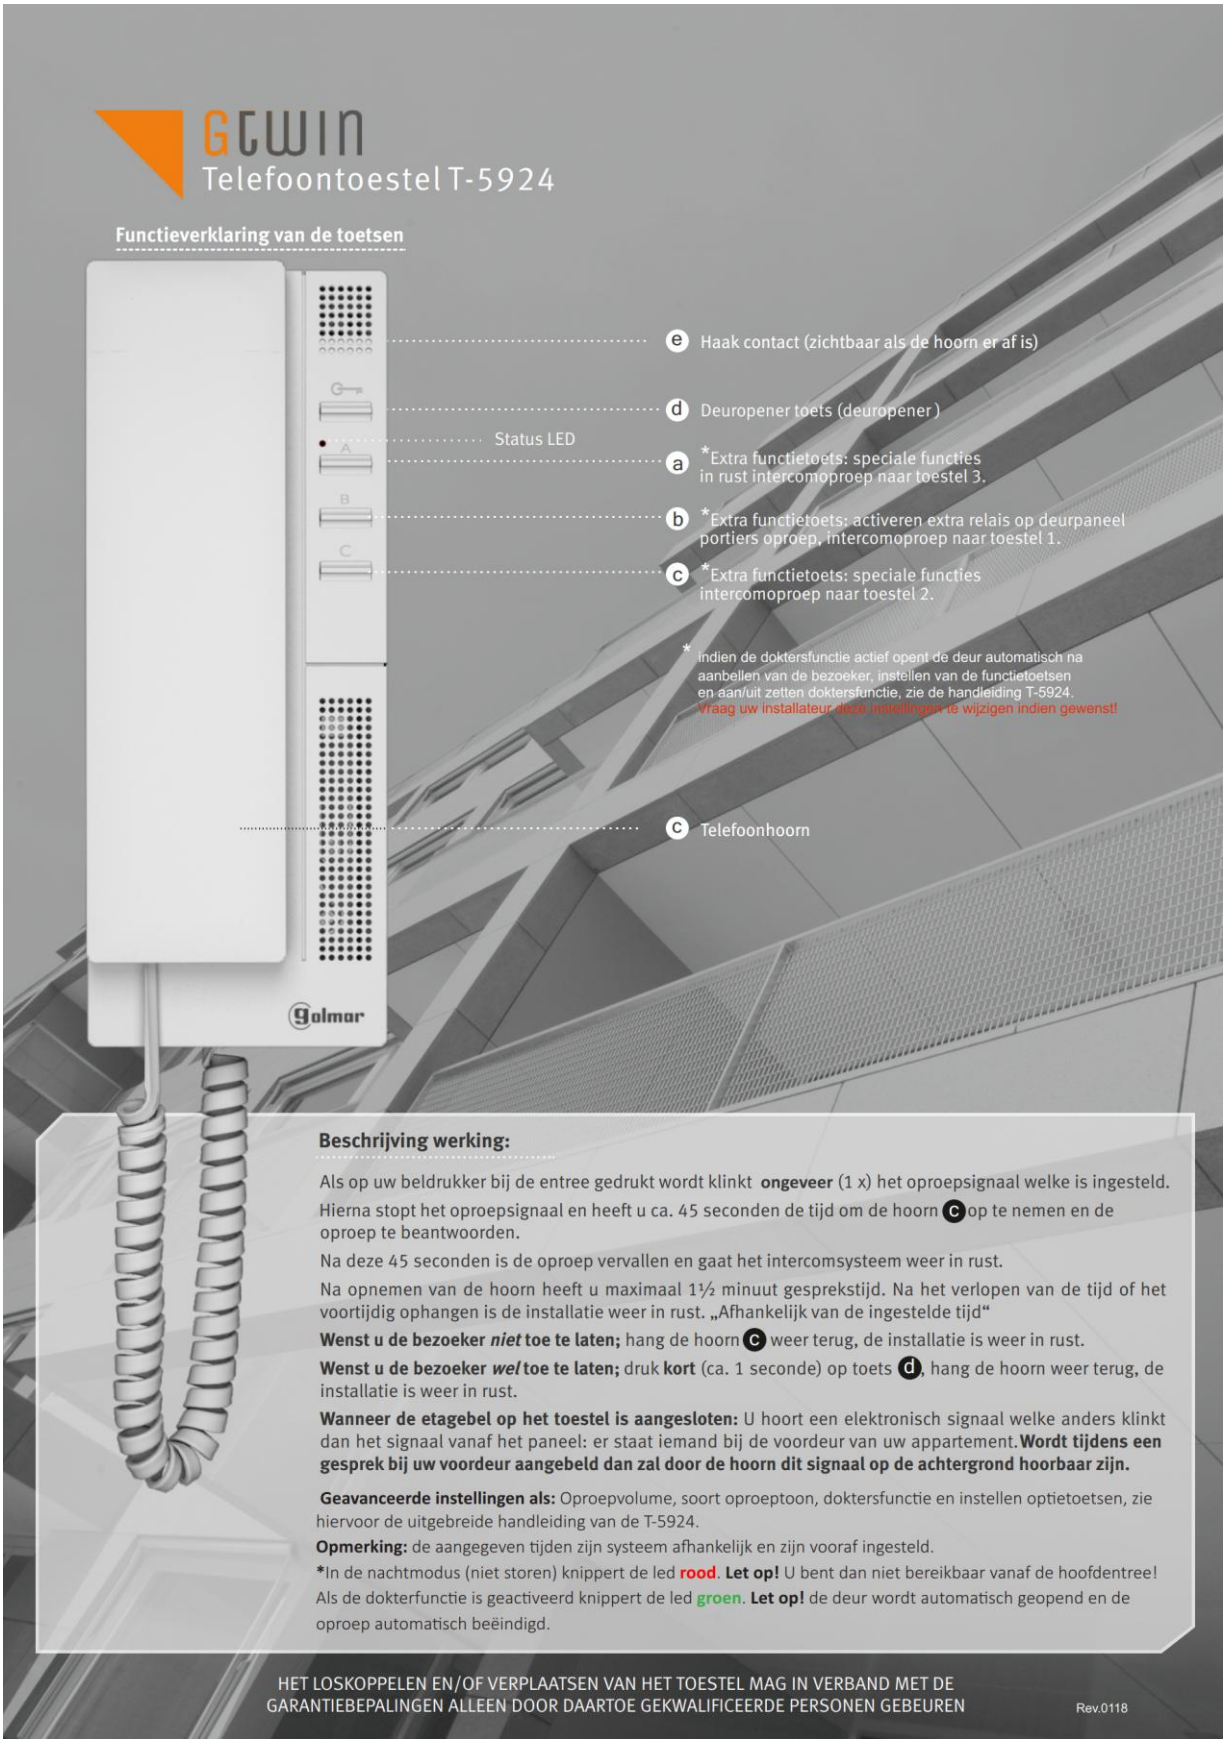
Intercom User Manual

The image below shows the intercom device as supplied by the manufacturer.



Test descriptions

• Door opener button: opens the entrance door for visitors.

• Status LED: Displays the current status of the device.

• Additional function keys: can perform additional functions such as intercom calls or relay control depending on the installation.

• Handset: Pick up to have a conversation with the visitor.

Operation

1. When the doorbell rings, a call signal sounds.

2. Pick up the handset within approximately 45 seconds.

3. Have the conversation with the visitor.

4. Press the door opener button to grant access.

5. Hang up the handset to end the call.

Status Indications

Flashing red: do not disturb / night mode active.

Flashing green: Doctor's function active, door opens automatically after ringing the bell.

Important

Do not remove or move the intercom during painting or wallpapering work. Dismantling may only be carried out by qualified personnel.
